FUNCTIONAL SCOPE

This project is a ChoiceQR-like digital menu, not an ordering system.
QR code or direct link → web menu → categories → dish detail.
Each dish shows PRICE + ♡ TOTAL LIKES. Heart toggles the visitor's personal favorite.
Favorites are the only user interaction beyond navigation. No cart, checkout, payment, table ordering or reservations.
Informational sections: About, opening hours, contacts, location, social links. PT / EN language switch.
